

# Vomiting/Diarrhea

Does your pet have vomiting? diarrhea? both? Which came first?

When did you first notice it?

How often has it been happening? Has it been intermittent or constant?

What does the vomit and/or diarrhea look like?

Is there any blood or mucous in it? Was it there from the beginning, or did that start later?

What is the pet's normal diet?

Is your pet interested in eating or drinking?

If your pet is not eating, have you tempted him using treats or a favorite food?

Have you withheld food or water, or tried any special diets (bland diet, etc)?

Has the pet recently gotten into any table food, garbage, etc?

Does the pet have a history of eating "not food" (toys, socks, tissues, etc)?

Is there any known or suspected toxin exposure (antifreeze, rat poison, cleaning supplies, etc)?

How is your pet's activity level?

Has your pet recently been in a kennel or any unusual event (family picnic, party, visitors, swimming)?

Are there any other pets in the household that are ill?

Does your pet normally get any medications or vitamins? If yes, what are they and what is the dosage?

Have you given any medications to treat the vomiting and/or diarrhea?
