

Eye Problems

Is one eye or are both eyes affected?

Which eye? If both eyes are affected, does one seem more severe?

What signs did you first notice and when did you notice them?

If there is a discharge, please describe the color and type.

Has the eye changed in color or does it appear cloudy?

Is your pet holding the eyelid(s) shut or squinting?

Have you noticed the third eyelids covering the eye more?

Is your pet pawing at the eye(s) or rubbing the face?

Have the signs changed since you first noticed them?

Have you administered any medications to the eye(s)?

If so, what medication did you use? How long? How often?

Have you been cleaning or wiping the eye(s)?

If so, specifically describe how you have been cleaning and when you last did this?

Are you aware of anything that may have happened to your pet's eye(s)?

Has there been any known trauma?

Is your pet outside often?

Does your pet hunt?

Has your pet been anywhere new or have there been any substantial changes in your household?

Are there other pets in the household?

Does your pet have a history of any eye problems or been previously diagnosed with a chronic problem?

What, if any, medication is your pet currently taking?
